

-/ it is that easy to prevent people and animals from trespassing your tracks...

STRAILgrid – AN UNIVERSAL PANEL FOR EVERY INSTALLATION SITUATION

Trespassing of tracks can put people and animals in danger. It causes delays of trains when they are forced to stop and sometimes even unnecessary accidents.

STRAILgrid solves that problem – a universal panel with many advantages. Its main job, however, is to prevent people and animals from trespassing the tracks.

- ◆ rough surface > staggered spikes in **three** different heights
- ◆ just **one** panel for the inside and the outside plus intermediate elements (between rail-fastenings), make for a low number of parts > less is more!
- ◆ vulcanised universal panel > premium quality
- ◆ easy and quick installation > if necessary adjustable to local circumstances on site
- ◆ no weep holes necessary due to the geometry of the universal panel
